

Fuse two domains

```
poly %>%  
  ggplot() +  
  geom_polygon(aes(x = x, y = y,  
                   group = id, fill = value),  
              alpha = 1) +  
  theme_void() +  
  theme(legend.position = "none")
```

Step 2

Improvise
