# Fuse two domains

```r
poly %>%
  ggplot() +
  geom_polygon(aes(x = x, y = y,
                   group = id, fill = value),
                   alpha = 1) +
  theme_void() +
  theme(legend.position = "none")
```
